## ACKNOWLEDGMENTS

---

The South Florida Water Management District and the Florida Department of Environmental Protection gratefully acknowledge the contributions of the professionals who have made the *2005 South Florida Environmental Report – Volume I* (2005 SFER) a reality.

**Authors:** This report could not exist without the diligent effort of its authors. Their analyses of complex information form the substance of this work, and its quality and value are a reflection of their competence, commitment, and willingness to respond fully to peer review and public comment. Their professionalism and dedication are gratefully acknowledged. All authors are South Florida Water Management District staff except where noted.

**Editorial and Production Team:** The authors' products were organized, edited, and formatted by an editorial and production team of skilled professionals. Stacey Efron, South Florida Environmental Report Production Manager, plays a remarkable role in leading the team's efforts. The exceptional teamwork and productivity of these individuals are respectfully acknowledged: Ken Chen, Dianne W. Dorsey, Zoe Fedeles (Zoe Graphics), Christopher King, Heather Lewin, Patrick Lynch, Trudy Morris, Diane Smith, and Kathy Ronan.

**Project Team:** Palmer Mason, State Legislative Affairs Representative in the District's Office of Policy and Legislation, is the project sponsor for the *2005 South Florida Environmental Report*, and provided overall direction in its development. He has also led the effort for legislative modification, along with Henry Bittaker, David Gilpin-Hudson, Beth Ross, and representatives from the other water management districts and the Florida Department of Environmental Protection, in order to make water management district reporting in Florida more effective and efficient.

Garth Redfield, Chief Environmental Scientist in the District's Environmental Resource Assessment Department, serves as the project manager of the *2005 South Florida Environmental Report – Volume I*, managing its development in association with colleagues Stacey Efron, Gary Goforth, and Kirk Burns. This staff works closely with Frank Nearhoof of the Florida Department of Environmental Protection's Water Quality Standards and Special Projects Program to jointly coordinate the creation of Volume I, Chapter 2 and its associated appendices. Overall, this large, multidisciplinary document could not be produced without the thoughtful oversight of senior management. In particular, the effective leadership of Linda Lindstrom, Debra Azeredo, Keith R. Smith, and Jan Loftin from the District are gratefully acknowledged.

**Other Contributors:** The following individuals from the District's Environmental Resource Assessment Department provided essential data analyses and technical assessments for multiple report chapters and appendices in this volume: Violeta Ciuca, Guy Germain, Steven Hill, Nenad Iricanin, Julie LaRock, Cheol Mo, Richard Pfeuffer, Darren Rumbold, and Shi Kui Xue. The following individuals from the District are also acknowledged for their vital assistance in conducting the peer review and public workshops: Robin Campbell, Andrea Carlton, Linda Davis, Trudy Morris, and Michael Wedding.
